

Essentials Performance

MultiVitamin & Mineral

DESCRIPTION

Essentials Performance combines a multivitamin and mineral formula with a whole-food base to provide the added support of nutrients not found in a typical multivitamin. Essentials Performance is a comprehensive food-based multi, which contains all essential vitamins and minerals along with nutrient dense food extracts, herbs and other plant-based bioactive compounds.

FUNCTIONS

A multivitamin and mineral formula is “insurance” to help meet your daily requirements for essential nutrients. However, most multivitamins lack the important phytochemicals, biomolecules and enzymes found in food and shown to play important roles in health. Even a healthy intake of fruits and vegetables may not contain the concentration of these compounds found in a supplement. Add to this the stress of everyday life, poor diets and processed food, it becomes apparent that a multivitamin/mineral formula combined with a food base is essential

INDICATIONS

Essentials Performance may be a useful dietary supplement for those who wish to support their dietary intake of vitamins and minerals as well as the phytochemicals found naturally in food that have been shown to support health.
